- Vertical Light Chamber

Commissioned: Q2 2023

CTU Temperature Mapping  
Spring House, PA

The project involved the fit-out of this pharmaceutical company's new suite. Qualification services were required for equipment being relocated to the new suite. This included 5C Refrigerators, -20C Freezers, Stability Chambers and Vertical Light Chambers. PrecisCx reviewed the owner's URS and SOPs to develop and executed the qualification protocols and provided the temperature mapping equipment (via rental) for the project.
