- Packaged Rooftop Heating-Cooling Units
- Pumps
- Terminal Heating Units
- Variable Air Volume (VAV) Boxes
- Variable Frequency Drives as included in above HVAC equipment.
- Electrical Systems
- Electrical Distribution System
- Emergency and Standby Power Generation
- Lighting Controls - interior and exterior

Commissioned: Q4
2021

**US Foods Louisiana Distribution Center
Marrero, LA**

US Foods is a leading American foodservice distributor, partnering with over 250,000 restaurants and foodservice operators nationwide. The company expanded its Louisiana distribution center located outside New Orleans. The facility tripled in size to 205,000 SF with the additions of a full-service demonstration kitchen and training center as well as an interactive technology center for customers to learn about the company's web-based business solutions.

PrecisCx provided commissioning services for the expansion, which included energy-efficient refrigeration systems, energy-saving LED lighting, and optimized HVAC systems to help meet LEED goals.

The project has been registered with LEED BD+C: Warehouses and Distribution Centers with a target certification level of Silver; certification is pending.
